Mustafa Şahin

I have been working as a freelance software developer for more than 1 year. As a freelance software developer, I gained experience in various programming languages such as **React Native , JavaScript(frontend) , Rest-API (php)** and **3D modeling** in **Blender** environment. Lately, I've been experiencing **React Js , Node Js and Angular** technologies. I gained experience in **python - iGraph and text processing** in the works I did for my graduation project. I am passionate about research, education and training.
